

# BestDestroyer™ Technical Data

## Concrete Cleaner & Remover

### Product Description and Purpose

BestDestroyer™ is the safest and most aggressive concrete equipment cleaner on the market. With BestDestroyer™ you now get all the power of an acid without any of the hazards. This amazing cleaner utilizes state of the art surfactant technology and small molecular size to penetrate deep inside concrete residues and react within. It is this unique formulation that makes it ideal for cleaning and maintaining tools, equipment, and vehicles. SlurryDestroyer is a non-corrosive formula which means that even sensitive engine components and radiators can be cleaned without fear of damage.

### Features/Benefits

This product does NOT contain muriatic, sulfuric, phosphoric, hydrofluoric, or hydrochloric acids. Because of the less corrosive nature, this product can be used on most metal, painted and plastic surfaces without any concern for etching or damage.

#### Slurry Destroyer™

Organic Salts and Surfactants  
Safe  
None  
100% Biodegradable  
Non-corrosive  
Non Required

#### ACID-BASED CLEANERS

Contains Acid (HF, HCL)  
Unsafe  
Toxic Fumes  
Hazardous Waste  
Corrosive  
Special labeling, shipping

### Surfaces Applicable - Concrete

1. Daily washing solution can be diluted up to 3:1
2. Wet the area with water before applying BestDestroyer™.
3. Apply BestDestroyer™ with low pressure Foam applicator.
  - Quart size spray bottle with foam head
  - Concrete foam/spray unit
  - Pump up hand foamer, 2 gallon
4. Allow 20-30 minutes dwell time.
5. Re-hydrate with water by misting on surface until BestDestroyer™ re-activates and you notice a fizzing. Allow surface to dry and repeat this cycle a second time.
6. Following the re-activating stage, use high pressure power washers with turbo nozzles to remove any residue.
7. Heavy build up may require several applications. Pressure wash between applications.  
Approximately 1/4 to 1/2 inch of concrete can be loosened enough to power wash off per application.

### Physical Properties

Boiling Point: 212°  
Specific Gravity (Water = 1): 1.06  
Vapor Pressure: N/D  
VOC Content: N/D  
Vapor Density (Air=1): N/D  
Evaporation Rate (Water = 1): 1.0  
Solubility in Water: Soluble  
PH: 0.2-1.2  
Appearance and Odor: Clear, dark, yellowish liquid; pleasant citrus odor
