

Best Slurry System

EXPERIENCE THE FUTURE OF STONE SHOPS SYSTEMS!

Easy installation, seamless integration, or standalone use - ideal for any stone shop. Silica dust-free, clear water, efficient, and cost-effective for a cleaner environment, regardless of size.

This system comprises two essential components:

Best Slurry Feeder:

Simple and user-friendly operating system, adjusts BestSTONE™ dosage based on daily water usage.

Best Slurry Bubbler:

Custom-built according to your pit size.

The Bubbler blends the slurry with BestSTONE™, initiating the slurry-water separation process.

BEST SLURRY SYSTEM Includes: Best Slurry Feeder, Best Slurry Bubbler, 3 air hose and 3-Way Manifold

Directions:

Existing System:

1. Use Best-Slurry-System to evenly apply BestSTONE™ to the slurry pit based on daily water usage.
2. Turn on the Bubbler in the pit to start the slurry-water separation process.
3. Pump slurry into your existing system.
4. Process starts immediately, yielding quick results.

No Existing System:

1. Use Best-Slurry-System to evenly apply BestSTONE™ to the slurry pit based on daily water usage.
2. Turn on the Bubbler in the pit to start the slurry-water separation process.
3. This time, pump treated slurry into dewatering bags.
4. Retain solids in bags; treated water is now clean and ready for reuse.

Finish with BestDRY™:

1. Apply BestDRY™ to wet solid slurry in Dewatering Bags.
2. Mix for uniform coverage to prevent dangerous silica dust release.
