

# Painting Industry

## Introducing BestDRY™ - Your Solution to Mess-Free Brush Cleaning and Paint Disposal

Wondering if you can wash paint brushes in the sink?

We strongly advise against it! Why risk clogging your plumbing, exposing yourself to fumes, or pouring flamma-ble liquids down the drain?

What about tossing unwanted paint in your standard trash?

The answer is simple: Instead of the sink, use a clean, small container to efficiently clean your brushes without the plumbing risks and fumes exposure.

And then what? Now that your brushes are clean, what do you do with the water?

## Introducing BestDRY™ - The Ultimate and most easy Solution!

BestDRY™ is an eco-friendly solution designed to treat water used in paintbrush cleaning. Safely dispose of water without harming your plumbing or the environment.

## Paint Disposal Made Simple

### Directions

1. Mix BestDRY™ in your brush-cleaning or old paint container - 1/2 cup for each Gallon of waste water / paint.  
- Mix thoroughly.
2. Solidification - BestDRY™ solidifies in under 5 minutes - Ensure a complete transformation to a solid state.
3. Disposal - Deposit the solidified waste as you would with normal waste.
